### INFORMATION: Your group has become an isolated tribe!

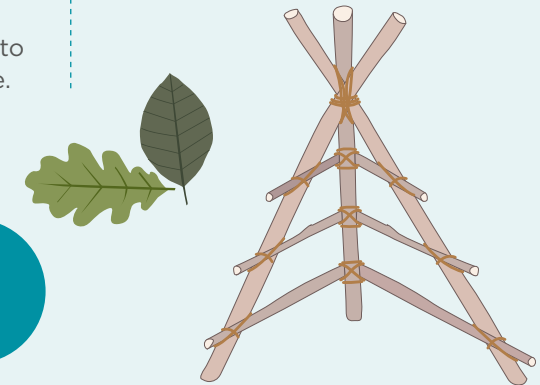

Using only a few resources and your groups' skills and ingenuity, you must set up a wind and water resistant shelter that is big enough for all of you to fit into.

You need to establish a cooking area/fire pit near your shelter.

As you are expecting long, lost relatives tomorrow, you want to show off your practical, artistic and identification skills in order to give them a hospitable welcome.

**Each member of the tribe needs to make at least one creative and one practical item for your new home from foraged natural resources.**

- Can each member of the group identify at least 4 different plants near your shelter?
- How many trees can you each identify?
